# GRATA International Mongolia will host a seminar on Doing Business

Dear friends, colleagues and partners,

We are pleased to invite you to a seminar on legal aspects of doing business in Mongolia. The seminar will be held on **March 4, 2022** in an online format on the ZOOM platform.

Mongolia is considered an agro-industrial country. Today it is actively trading with dozens of countries around the world. The economy is starting to stabilize and improve. Not the last role in the development of the country is played by the presence of a huge number of mineral deposits. But unfortunately, Mongolia does not have enough labor and financial resources for a full-fledged development. If we talk about the country's agriculture, then this area today is the basis of the entire economy. In addition, a huge amount of minerals is concentrated in Mongolia, such as: copper, coal, molybdenum, tin, tungsten and gold make up a significant part of the country's industrial production.

GRATA Mongolia office will speak at the webinar: **Bolormaa Volodya, Partner; Buyanjargal Tungalag, Associate and Solongo Gansukh, Associate.**
