Government adopted the bill to increase investor protection on the polish financial market

Government adopted the bill to increase investor protection on the polish financial market

On September 4, the government submitted to the parliament a bill strengthening the position of the Polish Financial Supervisory Authority (Polish financial regulator) and increasing investor protection. The draft amendment provides for obligatory dematerialisation of corporate bonds, investment certificates issued by closed-end investment funds and covered bonds, regardless of whether they were the subject of a public offering or whether they are intended for trading in any system, as well as their registration in a system created for this purpose.
