A draft law on energy saving has been developed in Turkmenistan

Deputy Chairman of the Cabinet of Ministers of Turkmenistan Baymyrat Annamammedov at a government meeting on Friday reported on the measures taken to develop the electric power industry, including the diversification of export routes and strengthening the country's position in the global energy market, improving legal regulation in the field of energy conservation. This was reported in the news release of the Turkmen State Television.

According to the Deputy Prime Minister, a draft law on energy conservation and efficient use of energy resources has been prepared, which is aimed at creating legal, economic and organizational foundations for stimulating energy conservation and improving energy efficiency.
