GRATA International Belarus, together with the National Agency of Investment and Privatization of the Republic of Belarus, has released an investment guide

Dear Readers,

The Belarusian office of GRATA International law firm is pleased to welcome you to the pages of our business guide, dedicated to the legal overview of investment opportunities in Belarus.

Our goal is to help navigate potential investors, who are considering Belarus as a potential new market entry for expansion/setting up industries, to form a general understanding about the legislation of our country.

Despite the ambiguous forecasts of the prospects for the development of the global economy in today's difficult environment (inflation, tightening banking policies, geopolitical fragmentation, COVID-19), we emphasize, that business finds growth opportunities, finds new product's / service solutions and new markets.

Everything that a business needs to know can be found here: a description of the regulation surrounding investment activities, legal frameworks of preferential zones, algorithms for setting up companies and comparing their organizational and legal forms.

Special attention is paid to the nuances of electronic money circulation, rules surrounding foreign exchange transactions, a description of the regulation of land relations, intellectual property protection and the taxation system.

We hope that the business guide will answer the questions and help your business.
