The pilot project on state registration of legal entities in electronic form was introduced

The pilot project on state registration of legal entities in electronic form was introduced

From March 1, 2019 to January 1, 2020, the pilot project on state registration of legal entities in electronic form is being implemented in the territory of Bishkek and Chui region.

The approved Temporary procedure for state registration of legal entities in electronic form determines the procedure for state registration of legal entities using the information system for online registration of legal entities through the information and communication Internet network, on the State portal of electronic services.

For online registration of legal entities, the applicant shall:

- 1) have an identification card - a passport of a citizen of the Kyrgyz Republic of 2017 issue (ID-card);
- 2) to log in to the Information System by means of a reader (smart card), allowing to authenticate the applicant and the person on whose behalf the information will be signed.

Documents for registration of legal entities are submitted to the judicial authorities in the form of an electronic image of the document. The electronic image of the document is created using technical means in the manner prescribed by the approved Procedure.

The resolution came into force on March 1, 2019.
